DPF REBORN 2.0[®]

DPF CLEANING MACHINE

Bring your Clogged DPF Back to Life

sarv[®]
Professional Tyre Tools & Equipments Since 1991

Product Description //

DPF REBORN 2.0 uses advanced hydropneumatic technology with pressurized water and pulsed air to deeply remove soot, ash, and oil residues from diesel particulate filters. It restores optimal airflow, protects the filter core, and extends DPF service life through an ECO-Friendly, Economical and OEM-Approved Cleaning Process.

Cleaning Chemical developed by SARV in India →
for perfect cleaning of DPF/SCR

Technical Specifications: //

Power supply	3 Phase, 440 Volts
Body Material	Stainless Steel 304 grade
Water Tank capacity	150 Ltr.
Water Heater	12 kW, 3 Phase 440 Volt
Filtration System	Replaceable filter for dirty water cleaning
Water Pump Motor	2.2 kW, 3 Phase 440 Volts
Dryer Air Blower Motor	2.2 kW, 3 Phase 440 Volts
Dryer Heater Load	11 kW, 3 Phase 440 Volts
Compressed Air Requirement	Max pressure-5-6 bars (to be free of dust and oil)
Total Power Consumption	28 kW /65 Amps
Machine External Dimensions	2200x1780X900mm (HxWxL)
Weight	400 Kg

KEY FEATURES //

Drying Function Upto 150°C	Touch Screen For Easy Operation	Advanced Hydropneumatic Technology	Pulsed Air + Pressurized Water Cleaning
Integrated Printer for Printing Test Results	Safe for Ceramic DPF Cores	Restores Near-Original Airflow Performance	From dirty to clean & dry In under 60 Minutes
Ideal for Professional Workshops	Removes Soot, Ash & Oil Residues	Testing parameter before and after cleaning	Rust Proof Longlife

STANDARD ACCESSORIES //

Universal Adapter	Circular Connector	Cross Connector	Straight Connector	Ring (7 Type)	Open Ring Set	Rubber Packing	Heavy Duty DPF Ring (4 Types)	Disc Attachment	Water Pipe (5 Mtr)
Tube Type Coupler (7 Types)	Hose Clamp (4 Types)	Chain With Hook for clamping	Eye Bolt M12 (4 Nos)	WING NUT (4 Nos)	Air Blow Gun	Oil Absorbing Filter Bag	Foot Leveling Pads(4 Nos)		

APPLICATIONS:

- ▶ Commercial Trucks & Buses ▶ Passenger Diesel Cars & SUVs ▶ Construction & Agricultural Machinery
- ▶ Industrial Diesel Engines ▶ Marine Diesel Applications ▶ Fleet Maintenance & Service Centers
- ▶ Automotive Workshops & Emission centers ▶ Diesel Service Center

DPF REBORN 2.0[®]

DPF CLEANING MACHINE

Bring your Clogged DPF Back to Life

sarv[®]
Professional Tyre Tools & Equipments Since 1991

Fully Automatic DPF Cleaning Process

1. Differential Pressure Test & Condition Check → Measures backpressure and identifies soot & ash blockage

2. Load & Seal DPF → DPF securely mounted in an enclosed, cleaning Chamber

3. Pre-Wash Cycle → Loosens hardened soot, oil and fuel residues

4. Hydropneumatic Deep Cleaning → Pressurized water + pulsed air dislodge embedded soot and from filter cells

5. Bidirectional Internal Flushing → Forward & reverse flow ensures complete soot removal across all channels

6. Hot Air Drying → Removes moisture and protects the ceramic DPF core

Elevate your workshop's performance with ***DPF REBORN***, the ultimate solution for fast, professional, and reliable cleaning of diesel particulate filters (DPF) and catalytic converters. Every step is designed to impress your clients and maximize efficiency.

HIGHLIGHTS

8

Can be worked on two DPF simultaneously.
One under drying and second one in cleaning operation. Hence saving on time.

1

Quick & Secure Connection
Attach any DPF or catalytic converter effortlessly with precision-engineered adapters. No hassle, no delays.

2

Professional Diagnostics
Deliver confidence from the start. ***DPF REBORN*** runs an initial test and prints a detailed report with customer data, back-pressure proof of your service quality.

3

Flexible Cleaning Programs
Choose from pre-set DPF and CAT cycles or create custom programs tailored to your workshop's needs. Your preferences are saved for instant access.

7

Why choose DPF Reborn?

Because it's not just a machine it's a ***business advantage***. Faster service, professional reporting, and guaranteed results mean more satisfied customers and repeat business.

6

Verified Results, Happy Clients

End with a final test and a professional report showcasing restored flow and reduced back-pressure. Your clients leave with proof of performance — and trust in your expertise.

INTUITIVE TOUCH SCREEN INTERFACE

5

Complete Drying Assurance

With drying temperatures of 100–150 °C, the ceramic is left moisture-free, ready for reassembly without risk of blockage.

4

Powerful Cleaning Performance

Pressurized water at optimal temperatures (30–50 °C) ensures deep cleaning. Adjust airflow and pressure to match the filter's condition for perfect results.

APPLICATIONS

Commercial Trucks & Buses

Passenger Diesel Cars & SUVs

Construction & Agricultural Machinery

Industrial Diesel Engines

Marine Diesel Applications

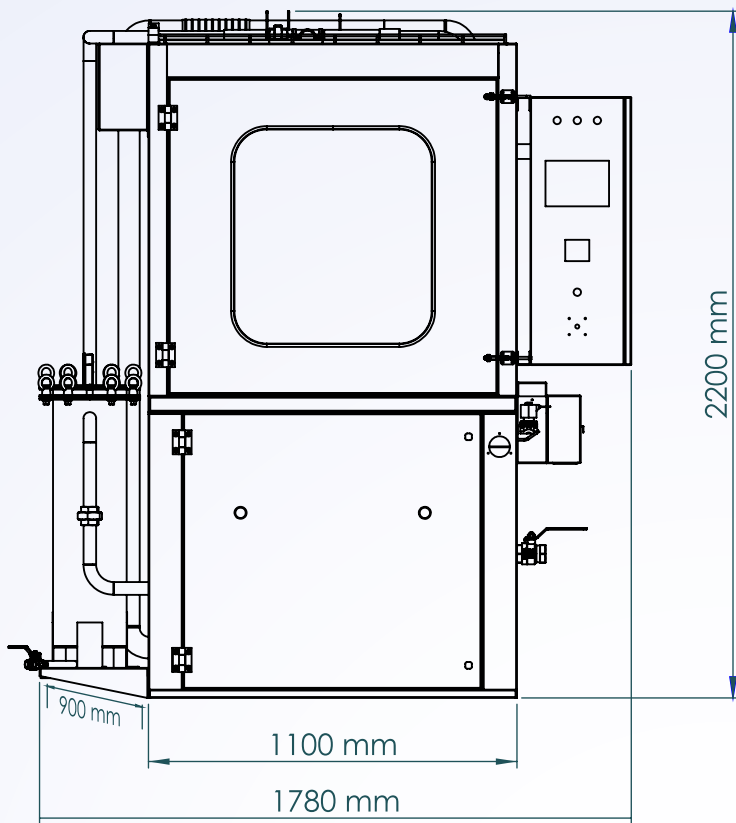

Fleet Diesel & Service Centers

Automotive Workshops & Emission Controls

Diesel Service Center
